The company's strategies in 2017 include the development of scientific and research activities, the development of partnerships on the main international markets, the development of the portfolio through the assimilation of new products as well as the increase of the presence of Antibiotice in pharmacies through the orientation of both the sales structure and the promotion policy towards valuable therapeutic drugs. All this will lead to long-term business consolidation and profit growth, both domestically and internationally.

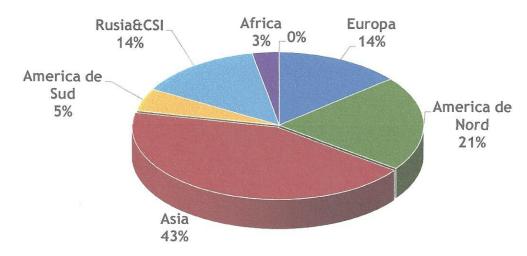

Antibiotice portfolio efficiently combines traditional products that continue to respond successfully to patients' needs and products to improve the quality of life as a result of the population's tendency to focus more on preventive therapies at the expense of treatments. With a growth rate of 24.1% in the first quarter of 2017, above the pace of the non-prescription drug market, OTC segment performance puts Antibiotice on the 18th place in the rankings of companies selling these portfolios.

The products that are the essence of the portfolio have maintained their leadership position in the first quarter of this year: the first place in consumption for pharmaceutical forms - injectable powders, suppositories and ointments. Antibiotice has also strengthened its position on the anti-infectives and dermatological products segment, for which it is ranked no. 1 in the prescription drug market and OTCs.

Taking advantage of the consumption trends, Antibiotice recorded increases higher than the market rhythm on valuable therapeutic areas and interest for the Romanian healthcare system: cardiovascular system: + 47% increase in the value of the portfolio compared to the first quarter of 2016 in the context of the market increasing to 7.1%, central nervous system: + 20% increase compared to the first quarter of 2016, as the market for this class increased by 8.7%.

Antibiotice lasi in Q1 2017 sales on foreign markets worth \$ 7.10 million, up approximately 21% over the same period of 2016, in the following geographic areas:

The increase in exports was represented by sales of finished products, especially in south east Asia, the United States. And Russia, CIS. The value of finished product exports grew by 44% in 2017 compared to the similar period of 2016, with the main products being marketed as anti-infectives, drugs for the digestive tract and cardiovascular products. Regarding the sale of Nystatin active substance, we strengthened our position on the US market, a strategic market for Antibiotics in order to maximize the product's profitability.

Antibiotice lasi carried out its activity during the first quarter of 2017 in the spirit of achieving the objectives and indicators established through the Budget of Income and Expenses.
